

"You Have a Choice ..."

As of September 2012 the Spring Brook Township board of supervisors hired a second agency to handle the building inspections for our municipality.

When applying for a building permit you must choose which agency you would like to provide the inspections for your project. Once you choose an inspection agency, this is the company that will conduct your plan review and you will contact to request your inspections. The inspection fees for both agencies are identical and both agencies employ inspectors certified to conduct inspections for both residential and commercial construction projects.

Your choices are:
